The Protein Data Bank (PDB) is an archive of experimentally-determined three-dimensional structures of biological macromolecules. It serves as a globally accessible resource for researchers in various fields, including biochemistry, structural biology, and computational biology.

The PDB is supported by a combination of Federal Government Agency funds and user fees. Support is provided by the U.S. National Science Foundation, the U.S. Public Health Service, National Institutes of Health, National Center for Research Resources, National Institutes of General Medical Sciences, National Library of Medicine, and the U.S. Department of Energy under contract DE-AC02-76CH00016.
