Received 6 May 2010; accepted 23 June 2010

Key indicators: single-crystal X-ray study; $T = 292\text{ K}$; mean $\sigma(\text{C}-\text{C}) = 0.003\text{ \AA}$; R factor = 0.057; wR factor = 0.178; data-to-parameter ratio = 19.1.

In the title compound, $\text{C}_{20}\text{H}_{21}\text{F}_2\text{NO}$, the piperidine ring in each of the two independent molecules in the asymmetric unit adopts a normal chair conformation with an equatorial orientation of the 3-fluorophenyl groups. The dihedral angles between the two 3-fluorophenyl rings are $49.89(7)$ and $50.35(7)^\circ$ in the two molecules.

2,6-Bis(3-fluorophenyl)-3-isopropylpiperidin-4-one

R. Ramachandran, M. Rani, S. Kabilan and Yeon Tae Jeong

S1. Comment

Heteroatom containing six-membered cyclic compounds possess interesting stereochemistry such as conformation of the ring and orientation of the substituents. Several piperidin-4-ones were reported and analyzed their ring conformations by Noller & Baliah, 1948; Pandiarajan *et al.*, 1986. The present investigation was undertaken to establish the structure, conformation of the heterocyclic ring and orientation of the 3-fluorophenyl groups by X-ray diffraction analysis.

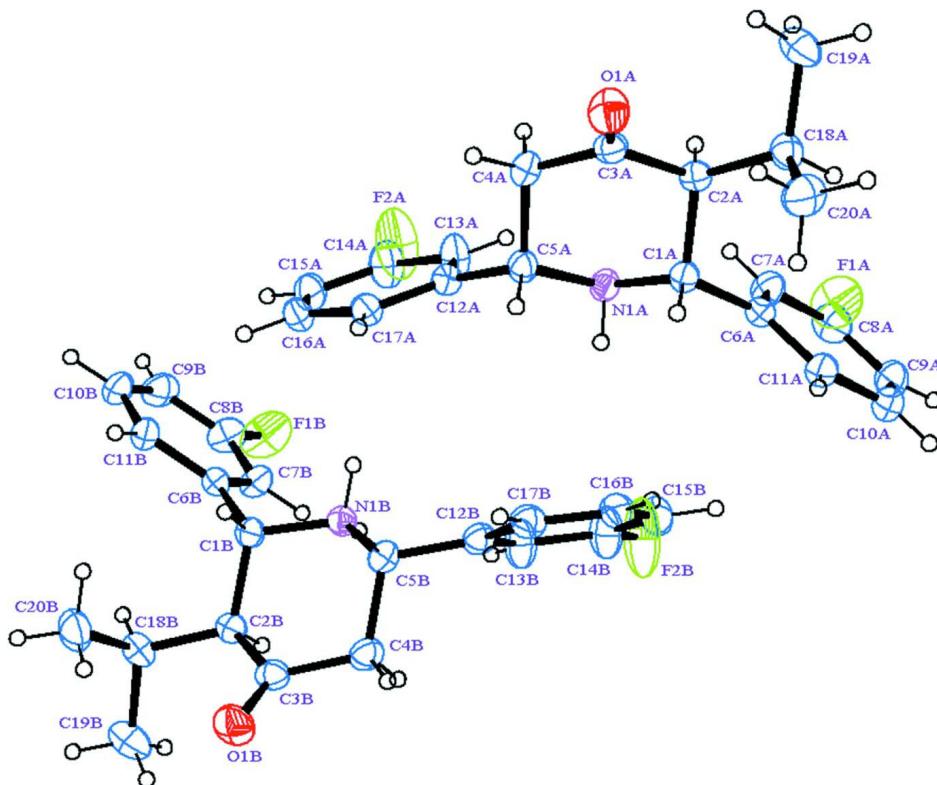

In the molecular structure of title compound, six-membered heterocyclic ring (Fig.1) adopts normal chair conformation with the puckering parameters (Cremer & Pople, 1975) and the smallest displacement asymmetry parameters (Nardelli, 1983) being q_1 and q_2 are 0.082 (2) \AA and -0.577 (2) \AA , respectively. The total puckering amplitude, $Q_T=0.5823$ (19) \AA ; $\theta=171.9$ (2) $^\circ$. The dihedral angle between the 3-fluorophenyl rings is 49.89 (7) $^\circ$ and 50.35 (7) $^\circ$ of molecule A and B respectively.

S2. Experimental

The title compound was prepared by the condensation of 4-methylpentan-2-one, 3-fluorobenzaldehyde and ammonium acetate in 1:2:1 molar ratio as reported by Gayathri *et al.*, 2008; Ramachandran *et al.*, 2007. Diffraction quality crystals were obtained by recrystallization of the crude sample from ethanol.

S3. Refinement

The hydrogen atoms were positioned and refined using a riding model, with aromatic C—H = 0.93 \AA , methine C—H = 0.98 \AA , methylene C—H = 0.97 \AA and methyl C—H = 0.96 \AA . The displacement parameters were set for phenyl, methylene and aliphatic H atoms at $U_{\text{iso}}(\text{H}) = 1.2U_{\text{eq}}(\text{C})$ and $1.5U_{\text{eq}}(\text{methyl C})$.

**Figure 1**

The molecular structure of title compound with the atom numbering scheme. Displacement ellipsoids are shown at 30% probability level. H atoms are presented as a small spheres of arbitrary radius.

Primary atom site location: structure-invariant direct methods

Secondary atom site location: difference Fourier map

Hydrogen site location: inferred from neighbouring sites

H atoms treated by a mixture of independent and constrained refinement

$$w = 1/[\sigma^2(F_o^2) + (0.0848P)^2 + 0.3074P]$$

where $P = (F_o^2 + 2F_c^2)/3$

$$(\Delta/\sigma)_{\max} = 0.001$$

$$\Delta\rho_{\max} = 0.36 \text{ e } \text{\AA}^{-3}$$

$$\Delta\rho_{\min} = -0.26 \text{ e } \text{\AA}^{-3}$$

Special details

Geometry. All s.u.'s (except the s.u. in the dihedral angle between two l.s. planes) are estimated using the full covariance matrix. The cell s.u.'s are taken into account individually in the estimation of s.u.'s in distances, angles and torsion angles; correlations between s.u.'s in cell parameters are only used when they are defined by crystal symmetry. An approximate (isotropic) treatment of cell s.u.'s is used for estimating s.u.'s involving l.s. planes.

Refinement. Refinement of F^2 against ALL reflections. The weighted R -factor wR and goodness of fit S are based on F^2 , conventional R -factors R are based on F , with F set to zero for negative F^2 . The threshold expression of $F^2 > \sigma(F^2)$ is used only for calculating R -factors(gt) etc. and is not relevant to the choice of reflections for refinement. R -factors based on F^2 are statistically about twice as large as those based on F , and R -factors based on ALL data will be even larger.
