mixture to obtain colourless blocks.

S3. Refinement

O-bound H atom was located from the difference map and refined freely, [O–H = 0.86 (2) Å]. The remaining H atoms were positioned geometrically [C–H = 0.95 and 1.00 Å] and refined using a riding model with $U_{\text{iso}}(\text{H}) = 1.2 U_{\text{eq}}(\text{C})$. The same U^{ij} parameter was used for atom pairs C23/C24 and C22/C21.

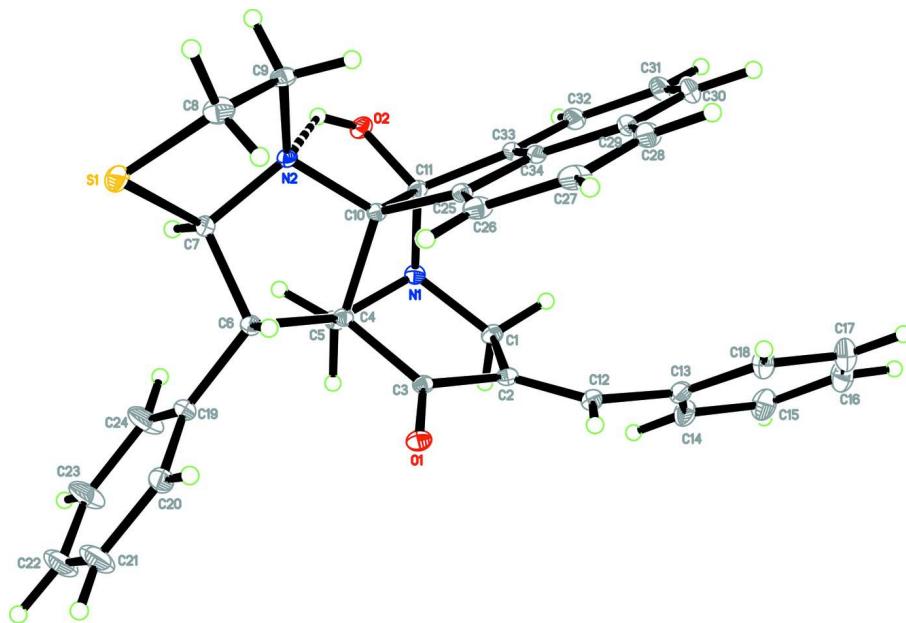

Figure 1

The molecular structure of the title compound, showing 30% probability displacement ellipsoids.
