A correction is made to the Matthews coefficient in the article by Lu *et al.* (2013, *Acta Cryst.* **F69**, 934–936).

---

In the article by Lu *et al.* (2013) the Matthews coefficient is incorrect. The correct Matthews coefficient should be  $3.25 \text{ \AA}^3 \text{ Da}^{-1}$  instead of  $1.47 \text{ \AA}^3 \text{ Da}^{-1}$ .
