### **Notes and News**

Announcements and other items of crystallographic interest will be published under this heading at the discretion of the Editorial Board. The notes (in duplicate) should be sent to the Executive Secretary of the International Union of Crystallography (J. N. King, International Union of Crystallography, 13 White Friars, Chester CH1 1NZ, England). Publication of an item in a porticular issue cannot be guaranteed unless the draft is received 8 weeks before the date of publication.

### **International Union of Crystallography**

Change of Editor of the Journal of Applied Crystallography

The Executive Committee of the International Union of Crystallography would like to announce that at the Eighth General Assembly of the Union, held in August 1969, Prof. A. Guinier (Orsay, France) was elected President of the Union for the term ending at the close of the Ninth General Assembly to be held in 1972. This has made it impossible for him to continue as Editor of the *Journal of Applied Crystallography* which he helped to launch and has led through the first two volumes.

As from 1 January 1970, the new Editor will be Prof. R. A. Young, School of Physics and Engineering Experiment Station, Georgia Institute of Technology, ATLANTA, Georgia 30332, U.S.A., who is already on the *JAC* Editorial Board. Prof. Guinier will continue on the Board as a Coeditor.

Early Papers on Diffraction of X-rays by Crystals

On page 141 the line above the reference to paper 38 should read

The white Lorentz-factor  $1/\sin^2\theta$ 

instead of  $1/\sin \theta$ .

# Second International Symposium on Organic Solid-state Chemistry Rehovot, Israel, 14-18 September 1970

The Second International Symposium on Organic Solid-State Chemistry, co-sponsored by the International Union of Crystallography and the International Union of Pure and Applied Chemistry, will be held at the Weizmann Institute of Science, 14–18 September 1970. Topics to be emphasized

are: simple reactions in organic solides with pertinent background material (structure, defects, etc.); inter-and intra-molecular energy transfer; spectroscopy of molecular solids.

Those interested in additional information should contact the organizing secretary: Prof. M. D. Cohen, Weizmann Institute of Science, Rehovot, Israel.

## Third International Conference of Crystal Growt (I.C.C.G-3) Marseille, France, 5-9 July 1971

The programme planned for the Conference includes the theory of crystal growth; the characterization of crystals in relation to their way of growing; fundamental experimental work dealing with growth from the vapour phase, from the melt and from aqueous solution, growth at high pressures or temperatures, transformations in the solid phase and recrystallization, crystallization of big polymers and biological crystals. Sessions will also be held on new techniques for the production of single crystals and on crystallization on an industrial basis.

Parallel sessions are planned and a film show and an exhibition will be held.

For further information apply to:

General Secretary of the I.C.C.G-3

B. Mutaftschiev

Faculté des Sciences de Marseille

Saint-Jérôme 13, Marseille 13e, France.

## Second International Conference on Small-Angle X-ray Scattering Graz, Austria, 26–29 August 1970

The Second International Conference on Small-Angle X-ray Scattering will be held on 26–29 August, 1970 at Graz, Austria. Further information may be obtained from: Professor O. Kratky, Institute for Physical Chemistry, University of Graz, Heinrichstrasse 28, A-8010 Graz, Austria.
