catalogue lists electrical, instrument and liquid feedthroughs in a selection of flange styles. As one of Europe's largest manufacturers of ionization gauges, ITL offers an exceptionally wide range of glass-encapsulated and nude ionization gauges covering operational pressures from  $10^{-1}$  to  $10^{-9}$  Pa.

High-quality glass, quartz, sapphire and magnesium fluoride windows are available in a variety of flanges in both zero length and other formats: ITL's differentially pumped viewport offers transmission to  $10+\mu m$ .

The range of flexible connectors has been increased to provide KF/CF combinations in all popular sizes; these can be vacuum annealed for added flexibilty. Each catalogue section includes a useful reference section describing sealing techniques and applications information.

A completely new section of the catalogue introduces ITL's Vacuum Chamber Division.

Instrument Technology Limited, Castleham Road, St Leonards-on-Sea, East Sussex TN38 9NS, England.

## **Books Received**

J. Appl. Cryst. (1995). 28, 68

The following books have been received by the Editor. Brief and generally uncritical notices are given of works of marginal crystallographic interest; occasionally, a book of fundamental interest is included under this heading because of difficulty in finding a suitable reviewer without great delay.

Handbook of crystal growth. Vol. 1: Fundamentals. a: thermodynamics and kinetics; b: transport and stability. Edited by D. T. J. Hurle. Pp. xiv + 1218. Elsevier: North Holland Elsevier Science Publishers, 1993. Price US \$388.50. ISBN 0-444-88908-6. A review of this book, by William R. Wilcox and Liya L. Regel, has been published in the September 1994 issue of Acta Crystallographica Section A, pages 652–653.

Accuracy in powder diffraction II. National Institute of Standards and Technology Special Publication 846. Edited by E. O. Prince and J. K. Stalick. Pp. vi + 234. Washington: US Department of Commerce, 1992. Price US \$14.00. US

Government Printing Office stock number 003.003.03186.1. A review of this book, by Hugo Steinfink, has been published in the September 1994 issue of *Acta Crystallographica Section A*, pages 653–654.

Out of the crystal maze. Chapters from the history of solid-state physics. Edited by L. Hoddeson, E. Braun, J. Teichmann and S. Weart. Pp. xxiii + 697. Oxford: Oxford University Press, 1992. Price £50.00. ISBN 0-19-505329-X. A review of this book, by Hugo Steinfink, has been published in the November 1994 issue of Acta Crystallographica Section A, pages 796–797.

Random, non-random and periodic faulting in crystals. By M. T. Sebastian and P. Krishna. Pp. xv + 383. Reading: Gordon and Breach Science Publishers, 1994. Price £85.00. ISBN 2-88124-925-6. A review of this book, by Hassel Ledbetter, has been published in the November 1994 issue of Acta Crystallographica Section A, page 797.
