catalogue lists electrical, instrument and liquid feedthroughs in a selection of flange styles. As one of Europe's largest manufacturers of ionization gauges, ITL offers an exceptionally wide range of glass-encapsulated and nude ionization gauges covering operational pressures from \(10^{-1}\) to \(10^{-9}\) Pa.

High-quality glass, quartz, sapphire and magnesium fluoride windows are available in a variety of flanges in both zero length and other formats: ITL's differentially pumped viewport offers transmission to \(10^+\) pm.

The range of flexible connectors has been increased to provide KF/CF combinations in all popular sizes; these can be vacuum annealed for added flexibility. Each catalogue section includes a useful reference section describing sealing techniques and applications information.

A completely new section of the catalogue introduces ITL's Vacuum Chamber Division.

Instrument Technology Limited, Castleham Road, St Leonards-on-Sea, East Sussex TN38 9NS, England.

Books Received

The following books have been received by the Editor. Brief and generally uncritical notices are given of works of marginal crystallographic interest; occasionally, a book of fundamental interest is included under this heading because of difficulty in finding a suitable reviewer without great delay.
