Energies for the primary K and L lines have been extracted from Markowicz, A. A. (2002). *Handbook of X-Ray Spectrometry*, edited by R. E. van Grieken and A. A. Markowicz, 2<sup>nd</sup> Edition, Chapter 1, X-ray Physics, pp. 1 – 94. New York: Marcel Dekker, Inc. The reader is referred to this text for a full listing of principal emission lines.

Note that the proper selection of the energy to monitor for a particular system should be based on the instrument excitation source and detector, as well as the particulars of the system being studied.
