

pubBio

Prepare, Edit, Submit, Publish Biological Articles Online

pubBio is an online tool for preparing the text, experimental data tables and figures for a structural biology or crystallization article. *pubBio* automatically conforms to journal style and at the same time ensures that you include all the items needed for a submission

With *pubBio* you can:

- Prepare ready-to-submit articles complete with interactive figures
- Search for authors and affiliations online
- Input experimental data automatically
- Build your own data resources for use in future projects
- Check and format references
- Preview your article in HTML and download it as an RTF file
- Submit your article online

pubBio features:

- Personal web space
- Storage of names and addresses, standard laboratory protocols, instrumentation etc.
- Interactive structure visualization
- Context-sensitive help
- Simplified online submission

pubBio will allow you to avoid the time-consuming process of re-entering data and realise the benefits of preparing your article using an application tailored to online submission.
