

Book Reviews

Works intended for notice in this column should be sent direct to the Book-Review Editor (R. F. Bryan, Department of Chemistry, University of Virginia, McCormick Road, Charlottesville, Virginia 22901, USA). As far as practicable, books will be reviewed in a country different from that of publication.

Acta Cryst. (1996). A52, 508

Books Received

The following books have been received by the Editor. Brief and generally uncritical notices are given of works of marginal crystallographic interest; occasionally, a book of fundamental interest is included under this heading because of difficulty in finding a suitable reviewer without great delay.

Crystallography. Second Edition. By WALTER BORCHARDT-OTT. Pp. xii + 307. New York: Springer-Verlag, 1995. Price US \$29.95. ISBN 3-540-59478-7. An

English language translation, by Dr R. O. Gould, of the fifth German language edition of *Kristallographie*. The first English language edition (translation of the fourth German edition) has been reviewed in this journal [*Acta Cryst.* (1994), A50, 552]. This new edition features an expanded treatment of crystal morphology with exercises on the use of stereographic, orthographic and gnomonic projections, but is otherwise indistinguishable in content from the first.
