## book reviews

Works intended for this column should be sent direct to the Book-Review Editor, whose address appears in this issue. All reviews are also available from **Crystallography Journals Online**, supplemented where possible with direct links to the publisher's information.

## books received

The following books have been received by the Editor.

Brief and generally uncritical notices are given of works of marginal crystallographic interest; occasionally, a book of fundamental interest is included under this heading because of difficulty in finding a suitable reviewer without great delay.

**The weak hydrogen bond in structural chemistry and biology.** By Gautam R. Desiraju and Thomas Steiner. **IUCr Monographs on Crystallography**, Vol. 9. Oxford: Oxford University Press/International Union of Crystallography, 1999, pp. xiv + 507. Price £85.00. ISBN 0-19-850252-4.

A review of this book, by G. A. Jeffrey, has been published in the April 2000 issue of *Acta Cryst.* Section B, pages 333–334.
