Received 12 October 2010; accepted 1 November 2010

The chemical formula in the paper by Wojciechowska & Daszkiewicz [*Acta Cryst.* (2007), **E63**, m2975–m2976] is corrected.

---

In the paper by Wojciechowska & Daszkiewicz (2007), the nitrate ligand should be carbonate and the hydroxide counter-anion should be water, thus making the correct chemical composition  $[\text{Co}(\text{CO}_3)(\text{C}_{10}\text{H}_8\text{N}_2)_2](\text{NO}_3)\cdot 5\text{H}_2\text{O}$  and the correct chemical name bis(2,2'-bipyridine)(carbonato- $\kappa^2O,O'$ )cobalt(III) nitrate pentahydrate.
