A correction is made to the article by Lin *et al.* [(2010). *Acta Cryst.* **F66**, 932–934].

In the article by Lin *et al.* (2010) the gel filtration column was given incorrectly in §2.1 and in the figure caption for Fig. 2. A Superdex 75 column was used for gel filtration and not a Superdex 200 column as stated in the original article.
