Reduced-price subscriptions to IUCr journals

The International Union of Crystallography (IUCr) offers **reduced-price institutional subscriptions** to its six print journals.

Each year 20 new reduced-price subscriptions will be available for each of the six print journals. These will last for three years and cover from 25 to 85% of the costs of subscriptions. Successful applicants will be invoiced for 75 to 15% of the list price. Free online access to the journals via **Crystallography Journals Online** is included.

1. General conditions

The reduced-price subscriptions are distributed on a competitive basis according to the following rules:

(i) The reduced-price subscriptions should be distributed on a fair regional basis.

(ii) Countries which are members of the IUCr should receive priority over non-member countries.

(iii) Institutions publishing papers in IUCr journals should receive preference.

(iv) Reduced-price subscriptions are only open to institutions taking out new subscriptions.

2. Special conditions for 2001

The scheme will commence in 2001. Exceptionally only institutions that have not held a subscription in the years 1998–2000 will be eligible. 60 reduced-price subscriptions for each journal will be awarded as follows:

- (i) 20 with a duration of 1 year,
- (ii) 20 with a duration of 2 years,
- (iii) 20 with a duration of 3 years.

When the one-year and two-year reduced-price subscriptions expire, institutions are eligible to re-enter the scheme up to a maximum period of three years.

3. Administration

Application forms may be downloaded from the address <http://journals.iucr.org/services/grantsapp.pdf> and may also be obtained from:

The Executive Secretary
International Union of Crystallography
2 Abbey Square
Chester
CH1 2HU
England

Reduced-price subscriptions are financed from the IUCr's Journals Grant Fund and the granting procedure is determined by a Sub-committee of the IUCr Executive Committee, chaired by a member of the IUCr Executive Committee. The Sub-committee reports to the IUCr Executive Committee by providing a list of applicants in order of priority.

crystallographers

Harry Brumberger (1926–2000)

In the obituary of Harry Brumberger published in the February 2001 issue of the journal [*J. Appl. Cryst.* (2001), **34**, 88], one of the authors' names was unfortunately misspelled. We apologize for the error and correct it here. The authors of this article should have been **Jerry Goodisman**, **Salvino Ciccariello** and **Gernot Kostorz**.

Ludo Frevel Crystallography Scholarship

Christine M. C. McCracken (Clark) has been awarded a Ludo Frevel Crystallography Scholarship by the International Centre for Diffraction Data. Ms McCracken is currently working on the crystal chemistry of tourmaline for her PhD at the University of Manitoba, in collaboration with Dr Frank C. Hawthorne.
