

Acta Crystallographica Section B
**Structural
Science**

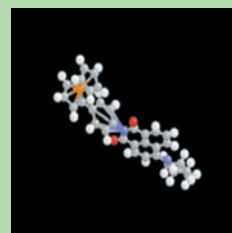

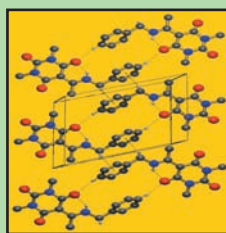

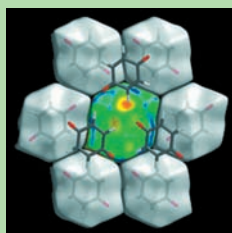

Editor: Carolyn P. Brock

Acta Crystallographica Section C
**Crystal Structure
Communications**

Editor: George Ferguson

Acta Crystallographica Section E
**Structure Reports
Online**

Editors: W. Clegg and D. G. Watson

Published by the International Union of Crystallography (IUCr), *Acta Crystallographica Sections B, C and E* — **Structural Science, Crystal Structure Communications** and **Structure Reports Online** — offer a full spectrum of publications for structural scientists. The IUCr's editorial boards and long-standing experience in crystallographic publishing ensure that these journals have a deserved reputation for structural reliability and high publication standards.

For comprehensive structural studies

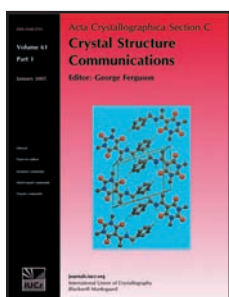

ISSN 0108-7681

Impact factor: 5.418

Acta Crystallographica Section B: Structural Science publishes papers in structural chemistry and physics in which structure is the primary focus of the work reported. The central themes of Section B are the acquisition of structural knowledge from novel experimental observations or from existing data, the correlation of structural knowledge with physico-chemical and other properties, and the application of this knowledge to solve problems in the structural domain. The journal has broad chemical coverage, encompassing metals and alloys, inorganics and minerals, metal-organics and purely organic compounds. In addition to reporting comprehensive structural studies in these areas, Section B also covers topics of general structural interest such as database mining.

For novel and challenging crystal structures

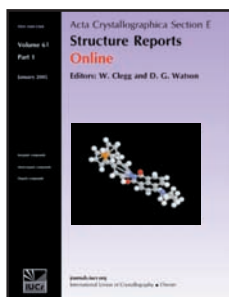

ISSN 0108-2701

Average publication
time: two months

Acta Crystallographica Section C: Crystal Structure Communications specializes in the rapid dissemination of high-quality studies of novel and challenging crystal and molecular structures of interest in fields such as chemistry, biochemistry, mineralogy, pharmacology, physics and materials science. The journal is well known for its high standards of structural reliability and presentation, but also includes studies involving special techniques or difficult crystalline materials. Section C publishes approximately 1000 structures per year; readers have access to a back archive that includes high-quality structural data for over 10000 compounds.

The IUCr, a not-for-profit scientific union whose role is to advance, promote and sustain quality in crystallography, publishes *Acta Crystallographica Sections B, C and E* in association with Blackwell Munksgaard. To subscribe, please complete the order form or subscribe online at journals.iucr.org. For further information about these and the other IUCr journals, please visit journals.iucr.org or contact the IUCr Promotions Officer, Andrea Sharpe, at as@iucr.org.

For rapid publication of structural results

ISSN 1600-5368

Average publication
time: less than one month

Acta Crystallographica Section E: Structure Reports Online

is the IUCr's highly popular all-electronic structural journal. It provides a simple and easily accessible publication mechanism for the growing number of inorganic, metal-organic and organic crystal structure determinations. The electronic submission, validation, refereeing and publication facilities of the journal ensure very rapid and high-quality publication, whilst key indicators and validation reports provide measures of structural reliability. Authors choose Section E for rapid publication of short structural reports. In 2004, the journal published more than 1800 structures.

General features

All three journals are available from **Crystallography Journals Online**. This innovative service provides a number of unique features including three-dimensional graphics for all structures, easy access to crystallographic information (coordinates and structure factors) and widespread use of colour, e.g. in the depiction of hydrogen-bonding schemes and inorganic structures. Free sample issues can be viewed at journals.iucr.org.

Benefits to authors

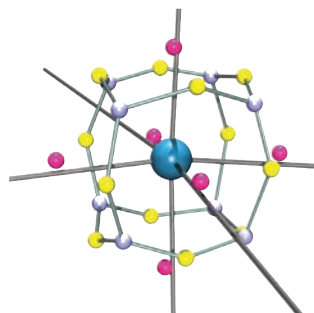

- open access option available for increased visibility
- online submission
- high-quality refereeing
- no page charges
- free online colour
- free electronic reprints
- rapid publication

checkCIF

All structures are validated with *checkCIF*, the IUCr's web-based crystallographic validation service. *checkCIF* is now used by several other major publishers to check their crystallographic data.

Benefits to readers

- online access to all articles back to 1948
- crystallographic data available for each structure featured
- full-text searching
- ChemPort and CrossRef linking
- linking to structural databases
- e-mail alerting service and forthcoming article previews
- diffraction data routinely archived for all structures

Researchers working in biology are catered for by **Acta Crystallographica Section D: Biological Crystallography** and **Section F: Structural Biology and Crystallization Communications**.

2006 order form

Subscribers to the print edition of any IUCr journal are entitled to access the corresponding online edition free of charge (print + e). Electronic-only subscriptions (e-only) are available at 95% of the cost of a print subscription.

The journals can be subscribed to individually or in discounted combinations. Subscribers to *Acta C* receive free access to *Acta E*. Subscribers to *Acta D* receive free access to *Acta F*. The full subscription policy for **Crystallography Journals Online**, including information about multisite and consortial access, is available at journals.iucr.org. Any queries should be directed to subscriptions@iucr.org. Prices are in GBP (USD in parentheses) and include postage where appropriate; subscriptions in North, Central and South America and the Caribbean must be paid in USD, all other areas in GBP.

E-only subscriptions in the EU are subject to VAT at 17.5% and print + e are subject to VAT at 5%. Institutions should provide a VAT registration number. For subscriptions in Canada, 7% GST will be added to the above prices. Personal subscriptions are only available to individual scientists for their own use and must be paid by personal cheque or credit card.

To subscribe, please tick the journal(s) required above, complete the payment details below and send the form to the IUCr Promotions Office, PO Box 951, Chester CH2 2WA, UK (fax: +44 1244 373675 or 314888). Please ensure your e-mail address is included to allow prompt access to the online journals.
