

Authors are encouraged to submit **Research Communications**, a new article type introduced in 2014.

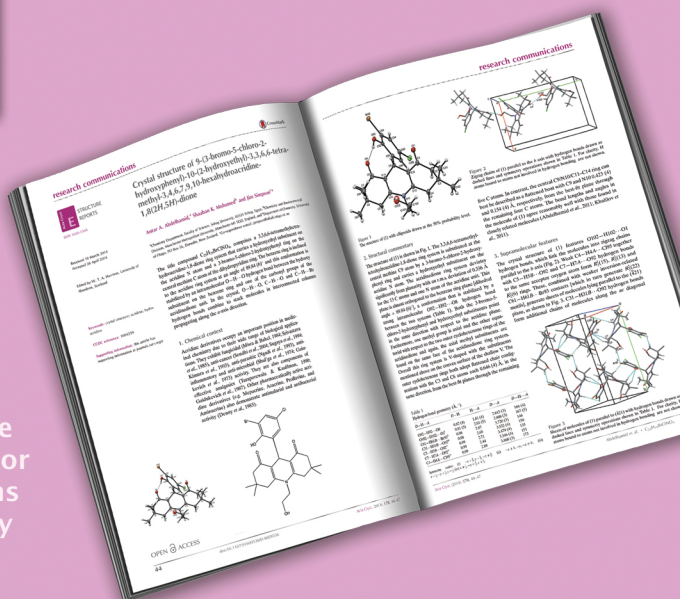

Research Communications are longer articles reporting one or more structure determinations with full discussion of the key scientific findings.

New subtitle!

Crystallographic Communications

Providing a **fast, simple** and **easily accessible** publication mechanism for crystal structure determinations of inorganic, metal-organic and organic compounds.

The electronic submission, validation, refereeing and publication facilities ensure rapid and high-quality publication.

Aims and scope

Acta Crystallographica Section E is the IUCr's open-access structural communications journal. The journal has been relaunched, publishing a new category of article, **Research Communications**, which are peer reviewed.

Submit your article at
journals.iucr.org/e/services/submit.html

Get **found**. Get **read**. Get **cited**.

IUCr Journals and Kudos – working together
to improve the **impact** of your published research
